For more than 55 years, the California Psychological Inventory™ (CPI™) instrument has provided a highly accurate and in-depth portrait not only of individuals' professional and personal styles, but also of their potential. Two forms of the instrument are available – the CPI 260® and CPI™ 343 – each geared toward a different professional application.

By describing individuals as others see them, the CPI™ assessments provide a portrait of personal and work-related characteristics, motivations, and thinking styles – as well as of how people manage themselves and deal with others. Built on the exceptional history, validity, and reliability, the CPI™ instruments are trusted and powerful tools for use in leadership development and selection, providing insights into individuals' strength and development opportunities.

Key applications of the CPI™ instruments are Leadership Development, Executive Coaching, Succession Planning, Selection and Talent Retention.

Workshop Details

The CPI™ Certification Program is designed to equip you with the information and experience you need to professionally and ethically administer the CPI™ instrument and interpret results. The interactive workshop covers instrument design, scoring, and interpretation with a focus on the key applications of individual and leadership development, identifying talent.

To ensure understanding of key learning points and the ethical and professional use of the instrument, a series of short multiple-choice questions will be administered. Correctly answering most of these questions will lead to successful completion of the certification program.
