## Apply type theory to enhance the benefits of **coaching** for the client and the coach

The Myers-Briggs Type Indicator® (MBTI®) Master Class Series Workshops are designed for certified practitioners who wish to deepen their understanding of type theory and its practical application

Planning for individual development requires making an honest assessment of one's goals and needs as well as identifying realistic steps to take to move forward. Many people interested in personal or professional development seek the assistance of a coach. While there are several ways to define coaching, for us it is the art of:

- Exploring and improving self-awareness
- Identifying personal strengths
- Understanding and managing, or compensating for, blind spots and developmental needs
- Strategizing for career and personal development
