

The MBTI® Healthcare Leadership Workshop

Doctors / Senior Nurses & Managers /Healthcare

The MBTI® Leadership workshop for Healthcare Professionals

Using your MBTI® preferences to serve your patients better

Adhering to the MBTI® framework and targeting patient-care provider communication, this workshop will help enhance your caregiving interactions and team engagement. This workshop will boost awareness of how your personality type preferences affect your particular *care style*.

Leadership discussions will be weaved into the program to allow healthcare leaders to share their personal leadership journeys and challenges, and how they can further enhance leadership effectiveness from insights drawn during program.

This Workshop is specially designed for

- Doctors
- Nurses Managers
- Leaders with potential to assume leadership roles in the healthcare sector

Healthcare professionals will:

Day 1:

- Learn concrete examples of MBTI® preferences to better understand how to connect with patients, including how personal strengths and blind spots come into play
- Discuss MBTI® preferences from the perspective of the patient and how to integrate MBTI® function pairs for reinforcing patient-centric care
- Use your MBTI® type preferences to identify innate stress triggers, reactions and management techniques

Day 2:

- Integrates a range of developmental experiences over 2 segment:
 - Self-Leadership
 - Team Leadership
- Gain awareness of how their own preferences and how to develop their people management skills and leadership skills to better lead in their functional roles
- Leverage workshop tools and techniques to develop a personalized action plan to lead a high performing healthcare team
