

Energy and Environment: Better Together

A Joint Mentorship Program of Alberta Energy and Alberta Environment

Can the energy sector and environmental groups work collaboratively? A joint mentorship program between two Alberta government ministries is showing that it can be done—with help from the *Myers-Briggs Type Indicator*® (MBTI®) tools.

The mentorship program began in 2005 as a pilot project in Alberta Environment. When Environment had an opportunity to enhance its mentorship initiatives in 2009, the timing coincided with Alberta Energy's plan to start its own mentorship program. "Our original program focused more on individuals," says Wendy Reukema of Alberta Environment. "It wasn't helping us so much with the connection between people in their partnerships or teams."

"Wendy and I talked about creating a new cross-ministry program," says Karen Gilchrist of Alberta Energy. "We can't work in isolation. This program is a tool to break down silos." Reukema and Gilchrist use a matching system to help partners find suitable mentors. In their applications partners define what they expect from themselves and their mentor, and mentors describe what they can offer. Partners and mentors are matched based on partner needs and mentor capabilities.

At the outset of each session, which runs from October to June, mentor and partner pairs develop a step-by-step plan to reach a desired learning outcome. To help them get there, the program provides separate orientations for mentors and partners, sessions on personality type and learning styles, networking opportunities, telephone and online check-ins with participants, and a wrap-up celebration. "The program gives people the framework, the tools, and the time to learn, but the learning is self-directed and self-paced," says Gilchrist.

As they developed the program, Reukema and Gilchrist did some learning of their own. "Power dynamics were a challenge," says Reukema. "We found that some partners had one-sided expectations from mentors, and some mentors saw their partner's questioning as disrespect."

"We wanted to get away from supervisor-subordinate relationships," says Gilchrist. "We use the term *partner*, rather than *mentee* or *protégé*. The nonpositional language helps participants think of each other as peers in a collegial environment."

Another challenge was making sure the program had practical value for participants. "These are busy people, so it had better be worthwhile," says Reukema. "We designed it to be inclusive yet broad in scope. The program supports individual needs, from onboarding new entry-level employees to preparing people to step up to the executive level."

To help achieve their goals of equality and practicality, Reukema and Gilchrist built the program's initial stage around the Myers-Briggs® Step I™ and Step II™ assessments, and the MBTI® Work Styles Report. "All these people are strangers to each other, and new relationships are stressful," explains Reukema. "The Myers-Briggs session gets them thinking about their own preferred work styles, and about using personality types to relate to one another."

Reukema says the MBTI® Work Styles Report, with its emphasis on balancing two different but equal styles, is useful for mentors and partners forging new relationships: “It helps them work through the ‘storming’ stage of becoming a two-person team.”

Reukema points out that partners aren’t the only ones who benefit: “The program is useful for mentors who may have little experience in managing people and personalities. This opportunity gives them a chance to develop skills such as relationship building and, in doing so, apply that learning to their partnership.”

With 15 pairs of participants this year and 17 last year, the program has helped both ministries meet some of their corporate objectives. “It fosters our ministries’ goal to work together, it addresses knowledge transfer, and it contributes to succession management,” says Gilchrist.

“Once the program has ended, a lot of partnerships continue informally, and a lot of them continue in friendships,” adds Reukema. “It’s an opportunity for people from different regions and different corporate cultures to come together and create networks. You can’t get this kind of learning in a classroom.”

“ All these people are strangers to each other, and new relationships are stressful. The Myers-Briggs session gets them thinking about their own preferred work styles, and about using personality types to relate to one another. ”

Wendy Reukema,
Alberta Environment

Wendy Reukema, organizational development and effectiveness adviser with Alberta Environment, holds a business management degree and is finishing her certificate in adult and continuing education. In her spare time, she is an instructor in organizational behavior and human resources at the Northern Alberta Institute of Technology.

Karen Gilchrist, manager of performance, learning, and compensation with the Department of Energy, holds a commerce degree and has been with the government for 25 years.

About CPP, Inc.

At CPP, our only job is to help you be a better HR professional and, in turn, help every employee flourish. While we're best known for our products, like the *Myers-Briggs Type Indicator*® assessment, CPP is also a group of people who can offer you the information, guidance, and support you need.

We offer solutions to help you improve organizational performance and address whatever challenges you face—from team building, leadership and coaching, and conflict management to career development, selection, and retention. Perhaps that's why millions of people in more than 100 countries use our products each year. They include individuals at Fortune 500 companies and businesses of all sizes, as well as educators, government agencies, and training and development consultants.

Since its founding in 1956, CPP, Inc., has been a leading publisher and provider of innovative products and services for individual and organizational development. Available in more than 20 languages, the company's hundreds of products help people and organizations grow and develop by improving performance and increasing understanding. Among CPP's world-renowned brands and services are the *Myers-Briggs Type Indicator*®, *Strong Interest Inventory*®, *Thomas-Kilmann Conflict Mode Instrument* (TKI), *FIRO*®, *CPI 260*®, and *California Psychological Inventory*™ (CPI™) assessments, and CPP Professional Services.

**Let's make a difference together.
